

TT SMART VISION

Face Matching

TT SMART VISION CO., LTD.

Face search system that can take a person's face from a photo or video to search and compare with the face database of people entering in the area. Which can work with the Face Detection and Analysis program that serves to capture the faces of people who come to the area. After the system compares the person's face image with the database, it will send a warning signal immediately. Which the system is suitable for searching and inspecting persons entering-out within office buildings, companies, organizations or industrial plants etc.

TT SMART VISION

Face Matching

TT SMART VISION CO., LTD.
